

## Super High Power Jammer (SHP Jammer)

The Room Cell Phone Jammer is an instrument to prevent cellular phone from receiving & transmitting the mobile signals to the base station (Specially for Auditoriums, theaters & mandirs). The Super High Power Cell Phone Jammer is best used at the following places.

### Features:

- LED power indicator.
- Three Omni-directional antennas are included.
- Quick and easy to install.
- Immediate results when activated.
- Automatic restoration of service.
- Safe and harmless.
- Ready to work in minutes

### Important Note

The jamming area is influenced by the location of the cell tower and the obstacles between cell tower & the cellular jammer.

It means that in normal condition if the distance is close between the cell tower & the cellular Jammer, it will have very less jamming area. Likewise, if there are obstacles & walls between the cell tower & the cellular phone, the jammer will give more jamming area.

### Specifications (SHP Jammer)

<b>Jamming Area</b>	15-45 Meters indoor area only (Depends on signal strength, at the site to be jammed)
<b>Cellular Systems</b>	(CDMA):860~885MHz (GSM): 925~965MHz (DCS.PHS): 1800~1950MHz GSM / CDMA / PCS / TDMA / DCS / AMPS / NMTP / Nextel
<b>Power Supply</b>	Hi 3W, Low 1.5W DC 12 V , 450 mA
<b>Dimension</b>	197x186x53mm
<b>Net weight</b>	1.2 KG (without adapter)
<b>Antenna</b>	Swivel type 360 degree rotary adjustment and 90 degree adjustment
