

Medium Power Jammer (MPJammer)

This unique device ensure a cellular phone communication free environment for desired period of time and control compound or to avoid information being disclosed secretly during meetings. And yet, it is jamming silently without cellular phone users' awareness.

Features

- Low output power will not cause harm to human body or medical equipment.
- Air freshener type is available for any place, without others' aware
- Avoid information being disclosed secretly during meeting.

Important Note

The jamming area is influenced by the location of the cell tower and the obstacles between cell tower & the cellular jammer.

It means that in normal condition if the distance is close between the cell tower & the cellular Jammer, it will have very less jamming area. Likewise, if there are obstacles & walls between the cell tower & the cellular phone, the jammer will give more jamming area.

Specifications (MPJammer)

Jamming Area	10 to 25 meters of indoor jamming area (Depends on signal strength, at the site to be jammed)
Cellular Systems	(CDMA): 800~895MHz (GSM): 890~964MHz (DCS.PHS): 1.700~2.000 GHz GSM / CDMA / PCS / TDMA / DCS / AMPS / NMTP / Nextel
Power Supply	12V, 1000mA 100V ~ 240V AC (9V1A AC adapter)
Dimension	L 245 x W 85 x T 98 mm
Net weight	650 gm
Antenna	Internal
