

Portable Tri – Band Jammer (PTB Jammer)

Introducing the "new" Tri-Band Mini-Phone jammer the most sophisticated Digital Cellular Mobile Phone Jammer off its class, a mobile device to help you keep away from noise or disturbance of cellular phone calls.

Features

- Coolest and lowest priced jammer on the market.
- Portable, Small, Compact and Robust.
- Battery or Mains compatible.
- To keep you away from noise or disturbance of unexpected cellular phone calls or text messages (SMS)
- World wide compatible.
- To paralyze cellular phone communication links within an effective area.
- No transmissions or a reception of cellular phone calls in coverage area.
- All specified frequency bands will be paralyzed simultaneously.
- The coverage area is in a room of 100-500 square feet.
- For use at meeting rooms, conference rooms, museums, galleries, theatres, concert halls, churches, temples, restaurants, classrooms, training centers, factories, banks, trains, buses etc.
- Easy to operate. No adjustment needed.

Note: After charging the Jammer you will see a green led light, however please **recharge the Jammer two more times** for full battery charging.

Important Note

The jamming area is influenced by the location of the cell tower and the obstacles between cell tower & the cellular jammer. It means that in normal condition if the distance is close between the cell tower & the cellular Jammer, it will have very less jamming area. Likewise, if there are obstacles & walls between the cell tower & the cellular phone, the jammer will give more jamming area.

Specifications (PTB Jammer)

Jamming Area	0.5 meters to 15 meters (1.6 Feet to 50 Feet) (Depends on signal strength, at the site to be jammed)
Cellular Systems	(CDMA)/ (GSM): 900MHz (DCS.PHS): 1800MHz GSM / CDMA / PCS / TDMA / DCS / AMPS / NMTP / Nextel
Power Supply	17dB 9V Battery / 12VDC input
Dimension	85mm(W) * 60mm(L) * 20mm(H)
Net weight	290gm Power supply/ Battery weight : 190
Antenna	Swivel type 360 degree rotary adjustment and 90 degree adjustment
