

Portable Mini JAMMER

USER MANUAL

Thanks for choosing our jammer for shielding mobile phone's signal. In order to be familiar with the operation of this machine as soon as possible, this end-user's manual provides, in details, the introduction of product, method of use, system set, the points for attention and variable notices. The series of mobile jammer have been identified and obtained corresponding certificates by the electric equipment testing center of the public security ministry of China, the electric equipment testing center of Shenzhen City and the protecting product testing center for electro-magnetism leaking of Guangdong Province.

This product can be used in any place where mobile phones are prohibited to be used!

Feature

A part of the features will be provided for better use of the jammer.

Specification

Type	Output Port	Frequency	Radius range	
	eDMA	87D880MHz	0.515 M @	depending
Type A	GSM	930960MHz	on the mobile service	
			provider's	network
	oes	1805 1920MHz	condition	
	GSM	869960MHz	0.512 M @	dependi ng
Type B	oes	1805 1920MHz	on the mobile service	
			provider's	network
	3G	2110 2170MHz	condition	
Power SUDDly,AC220V~C5V			Bui Itin Battery' 1500mA/h	
Energ~.consumrni~n : O. 5W/h		Weight' 150g	Size(L· W' HI '95' 45 '18mm	

Technical Feature

Taking use of super-high frequency and mini-power interference technology, high efficiency. Effectively making subsections, just interfering downlink and no interception on the base station. Extreme portability, the weigh for machine itself and antenna is just 150g. Low power consumption, working time for machine is about 2-3 hours, supplied power by battery. Slow start up design of circuit. These elements can maintain the stable operation condition with high integration.
