The Bluetooth speakerphone for the car, office and home.

The Visor is more than a powerful Bluetooth speakerphone for use in the car. Because of its excellent audio quality and voice pick up you'll want to use it in the office and in the home too!

In the car

With no installation necessary, the Visor makes an ideal Bluetooth car kit. The volume of the speaker can be adjusted to hear telephone conversations clearly, even in noisy surroundings. Its small, compact design and choice of mounting accessories mean it can be securely positioned in the car wherever you find it most convenient. The visor clip will safely attach the speakerphone to the sun visor. And its neutral colour tones are designed to complement your car's interior color and finish.

In the office

Because the Visor is so lightweight, compact and requires no external power source, it is portable enough to take to the office or away with you on business. The pivoting arm ensures that the microphone can be positioned for optimum voice pick-up. The Visor is equipped with volume control and mute button, which are particularly useful for telephone conferencing, and a headset port is available when more privacy is required.

Convenient

The Visor's rechargeable batteries give up to 6.5 hours talk time and up to 240 hours of standby time. The Visor can be recharged from the AC or vehicle power adapter or operate on a standard Nokia mobile phone battery.
