

DUAL-SIM CARD

Now e-mobile has made it easy to have a work and personal number combined on one phone!

The new 2 SIM in 1 can hold two different network telephone numbers at once: one for work, with a 2 in 1 sim card tariff plan owned by entrepreneur, and the other a personal number - as you like it. Thanks to two-way call forwarding, user can be accessible on both numbers at once! What's more, call forwarding between the two numbers on the SIM 2 in 1 is free of charge for tariff plans.

Save yourself the trouble of two telephones, and save by using it !

Either an existing personal number can be added to a work number on a SIM 2 in 1, or a new personal number can be arranged. Both numbers allow for activation of various services independently of one another, and additional benefits are provided that will make life easier and calling more pleasant:

Both numbers work independently of one another, so the user can easily switch between them.

Bills are also issued and sent independently of one another.

Both numbers can of course be divided onto individual SIM cards at any time.

With the new SIM 2 in 1 private and company calls can easily be distinguished!

Advantages of SIM 2 in 1

- Both online option
- Use 2 simcards with any mobile phone
- Adapter chip adds a menu in your phone in which you select the active simcard
- Menu-based online sim switch
- **NO NEED TO CUT YOUR SIMCARDS! NEW!**
- Employees who receive a company telephone do not need a second mobile phone for their personal number.
- Billing for personal and business calls is separate.
- Each telephone number can take advantage of various services independently of one another.
- An independent voice box service can be used free of charge for both numbers.
- Higher SIM card capacity for received SMS and telephone lists.
