

Instant Power Supply

The Instant Power Supply is a revolutionary new stand alone power solution with both AC and USB outlets for all your mobile needs.

Product Info

It is ideal for people who frequently travel by vehicle and/or airplane. If your laptop battery runs low or you need more play time with your portable game console or portable DVD, simply connect your device into the AC outlet and keep going. Two USB charge ports will keep your Blackberry™, iPaq™, Palm™, or iPod™ charged when you need it most. You no longer have to carry extra cords, chargers and device-specific batteries. You'll save money and space in your laptop carry bag!

We've seen plenty of mobile chargers in our day, but Instant Power Supply claims to be the first to power multiple devices simultaneously at different voltage and power levels. The unit includes a pair of USB ports and an AC plug, making it a quite convenient way to power your phone, iPod and laptop all at once. InstaPower promises plenty of power, too: 2 hours for laptops, 12 hours for portable game systems, and a spankin' 72 hours for the iPod nano. Of course, the lithium-ion based PowerSource is a decent bit heftier than a spare laptop or phone battery, but if gadget diversity is your game it doesn't seem you can go far wrong here.

Features

- > Converts 12 Vdc power from a vehicle battery into 120 Vac power
- > Three-prong AC outlet to handle all chargers and adapters for mobile electronics
- > Two USB charge ports
- > Blue LED on/off indicator
- > DC cable with vehicle and airplane connector
- > Lightweight AC charging adapter
- > 4.0 Ah lithium ion battery pack
- > LED battery status/charge status indicator
- > One year warranty
- > Protection Features

Over-temperature shutdown

- > Low battery voltage shutdown (10.5 Vdc with automatic reset)
- > Overload shutdown
- > Electronic Ground Fault Circuit Interrupter (GFCI)
