IP Camera

The IP Camera is a popular and reliable item which can help you to monitor anything not being in the place. This item is a must for working housewife who can monitor their kids left in residence. You need to fix up this IPCamera in your room in a strategic location and you can see everything what is happening in your from work place or anywhere in world on the screen of your laptop or PC. Owner of a shop or workshop can also monitor his business with the help of this IP Camera.

IPCamera makes life easier: Acharya monitors his business while Kale couple sees their children from office

IPCamera has made life easier for many. Bhubaneswar based business man Sekahar Acharya is always keen to be involved in his mobile phone business. But due to his business needs, he used to visit different metros like Mumbai and Chennai for a week at least. He was searching way to be able to monitor his mobile selling show room located in Bhubaneswar from another city. "In Mumbai, I came to know about the use of IPCameras . Immediately I visited www.kumaar.com office and collected this amazing new wireless camera. Now I have fixed IPCamera system in all my 4 mobile phone show rooms . I am able to monitor my Bhubanesware business from anywhere when I am on business tour." Says Acharya , a first user of this wireless internet camera.

Like Sekhar Acharya , many others are also using this IPCamera. Rangeeta Kale from New Delhi works for a company in Neheru Place as fiancé manager. Her husband is a Chartered Accountant (ca) who has a office in Gurugaon. The family stays in Greenpark with their two small children. Due to their professional schedules, they are not able to be present with their children always. A maid servant looks after the children and domestic matter in house during day time when they are in office.

The mother in Rangeeta always wants to know what is happening in house. " I saw a friend monitoring his residence as his old parents are staying there. An idea came to my mind. I opted for this IPCamera to monitor my house where my children stay with a maid servant in my absence. Like me , my husband is also able to see children from his laptop from his office or from his client's place when he was on tour to outstation. ", adds Rangeeta , who feels the IPCamera has added values to her motherhood.
